CONNECT WITH COMMITMENT

Banjo is an innovator and leading manufacturer of liquid handling products for agricultural and industrial applications around the world.

We manufacture the highest quality products and provide solutions to consistently deliver innovative products to keep ahead of our customers' needs. Making the right connection—part by part—can significantly impact your business success.

Our uniqueness is based on our passion and commitment. The trust we earn from our customers is essential to our success. We strive for customers to feel appreciated and listened to, feel assured in being served the right way, and confident in getting the right answers. Banjo's knowledgeable employees are nimble and responsive to freely share information. We are open-minded, passionate, and ready to serve with timely and helpful solutions.

CUSTOMER TRUST—For five decades we have worked hard in producing top quality, reliable products and have remained equally reliable in how we treat our customers.

EXPERTISE—The Banjo Engineering and Sales Groups have extensive knowledge and expertise in Liquid Handling Solutions, and continually push to maintain that edge.

HIGH QUALITY—Banjo understands how important high quality products are to the marketplace. Banjo's philosophy is to ensure that customers can always rely on quality and functionality of their products.

INNOVATION—Banjo originated by listening to those in need of a solution. Listening to our customers is a cornerstone of our business.

DIVERSE OFFERING—The breadth of the Banjo product line serves a vast array of applications in both industrial and agricultural markets.

QUICK AVAILABILITY—Marketed and sold globally, Banjo products are available when you need them, wherever you need them.

PASSION—Banjo employees genuinely take pride in what we do. Passion has shaped Banjo into who we are today.

CONNECT WITH CONFIDENCE

For over fifty years, customers worldwide have requested Banjo because they demand the highest quality, most reliable, and most innovative liquid handling products. We built our brand on a simple philosophy—make the products our customers want and make them better.

BETTER LIQUID FLOW: With product sizes that have evolved from 2" to 3" and now to 4", Banjo offers an assortment of fluid handling systems that give customers greater flow.

IMPROVED EFFICIENCIES: Products like the Super Pump, elbow sweep, and full-port valve increase flow; manifold flange connections decrease plumbing time; and Dry-Mate® connections prevent excess spillage.

LONGER LIFE: Banjo uses a special blend of glass-reinforced polypropylene to extend the life of its products in the harshest conditions, be it weather, pressure, or handling.

PRECISE PRODUCT TOLERANCES: Banjo has blended material science with sophisticated molding and machining processes that ensure products fit together perfectly today and in the future.

Farms choose Banjo products for their irrigation, fertilizer, sanitation, and other fluid control needs. Industries specify Banjo parts for a multitude of manufacturing, fluid transfer, treatment process, and other solutions.

Whatever the application, Banjo provides customers with solutions that improve efficiencies, save time, and increase the bottom line. When customers connect with Banjo, they connect with confidence.

CAPABILITIES AT A GLANCE

Banjo products provide great solutions for a variety of applications in various industries.

CONNECT WITH QUALITY

Banjo products are strong, durable, lightweight, chemical and corrosion resistant, have low moisture absorption, and are resistant to stress cracking and high impact. Products are available flanged, with National Pipe Thread (NPT), or upon request with British Standard Pipe Thread (BSP). With hundreds of products to choose from, our expansive offering is grouped by product categories below. Refer to our Banjo Catalogue for more details.

VALVES

Operating pressure ranges from 7 – 70 kg/cm² (PP 100-300 P.S.I.; SS 100-1,000 P.S.I.)

IBC/TANK ACCESSORIES

Available for bulk container applications

PIPE FITTINGS

Used in a wide variety of farming and manufacturing liquid applications

DRY DISCONNECTS

For a variety of applications to move hazardous chemicals for safe, easy, and spill-free connection

LINE STRAINERS

Operating pressure ranges from 5.27 – 10.55 kg/cm² (75 – 150 P.S.I.)

CAM LEVER COUPLINGS

Designed to connect piping and tubing for tanks, pumps, and transfer lines in sizes from 12.7 mm – 101.55 mm (1/2" to 4")

PUMPS

For use with gas engine, electric motor, pedestal, chemical, C-flange, hydraulic, or wet seal pumps

ELECTRIC VALVES

Operating pressure ranges from 7 – 10.6 kg/cm² (100 – 150 P.S.I.)

MANIFOLD FLANGE CONNECTIONS

For a variety of applications connecting two flanged parts with a gasket and a clamp—no thread

Scan this code with your mobile device for more information about Banjo.

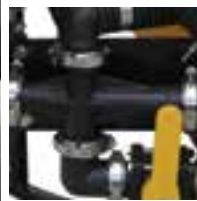

CONNECT WITH INNOVATION

BANJO MANIFOLD FLANGE CONNECTIONS

No Threads. No Sweat. Moving liquid from one point to another sounds easy, but liquid handling can at times be cumbersome and hard to manage. Customers are always looking for solutions that ease their operations and improve efficiencies.

A traditional threaded connection—whether NPT or BSP—is an adequate solution. But Banjo Manifold Connections are better. Connecting two flanged parts with a gasket and a clamp, rather than by thread, provides a strong, more resolute solution. Designers, engineers, farmers, and operators are all choosing Banjo Manifold Connections. These connections are smart, easy-to-use, versatile, and universal.

SMART—The quick-change connection allows you to replace or inspect fittings in seconds as opposed to time consuming threaded liquid handling systems.

EASY-TO-USE—There is no pipe thread installation, no chance of cross threading, no pipe sealant and no cure time needed.

VERSATILE—By nature of the connection it is easier to redesign, alleviate space constraints and add pieces to Banjo customers' liquid handling systems.

UNIVERSAL—No matter what part of the world in which you operate, threaded parts are no longer needed with the flange design.

Go ahead and make the Banjo Manifold Connection—your customers will love you for it.
